

C.O.P.E. Cyber Security

Digital Mobility with freedom and peace of mind

Even with the very best defences in place, breaches can and will occur; whether it's simple human error or a previously unknown method of intrusion.

Do you have the tools in place to constantly monitor for suspicious behaviours before they do significant damage?

What is C.O.P.E. Cyber Security?

C.O.P.E Cyber Security, focuses on enabling advanced security capabilities within the Microsoft365 E5 Suite. Bringing together our experience and expertise in **Advanced Threat Analytics, Cloud App Security, Identity Management** and **Azure Information Protection** can provide you with piece of mind and confidence to embrace mobility and modern work practises.
