

A new era of stricter data regulations has begun.

Welcome to our panel discussion on the business impact of the GDPR & DNB.

PANEL INTRODUCTIONS

- HOST - Paul Heaton, CEO, cubesys
- Chris Mohan, Cyber Security Leader
- Kenny Johar Singh, Cloud Solutions Architect, Microsoft
- Paul Hardy, IT Services Manager, Sydney Motorway Corporation

The **General Data Protection Regulation (GDPR)** imposes new rules on organizations in the European Union (EU) and those that offer goods and services to people in the EU, or that collect and analyze data tied to people in the EU, no matter where the organizations are located.

The **Mandatory Data Breach Notification (DBN)** came into Law in February 2018.

Enhanced personal privacy rights

Increased duty for protecting data

Mandatory breach reporting

Significant penalties for non-compliance

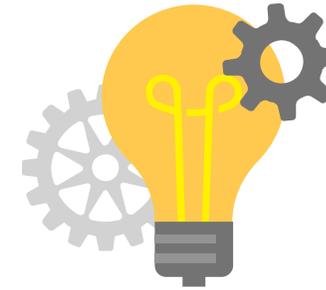

Data is at the center of everything in today's digital era.

Volume of data is **growing** exponentially

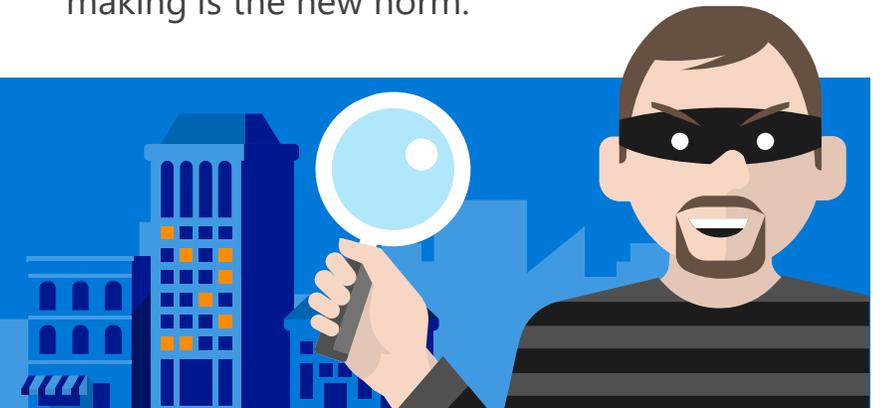

Data is being used in **new** ways

Automated decision making is the new norm.

Digital disruption is changing the landscape.

Ever-evolving threat of data breaches as cybercriminals get better at stealing personal data

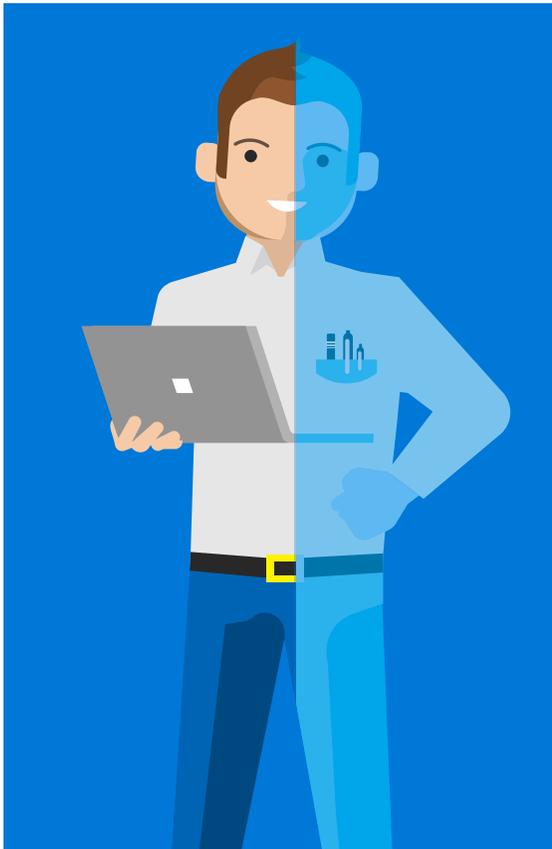

Privacy: a fundamental right

Data privacy and improved security have become key social and business issues. The (GDPR) defines an important new step in data privacy and compliance, accompanied by appropriate security measures.

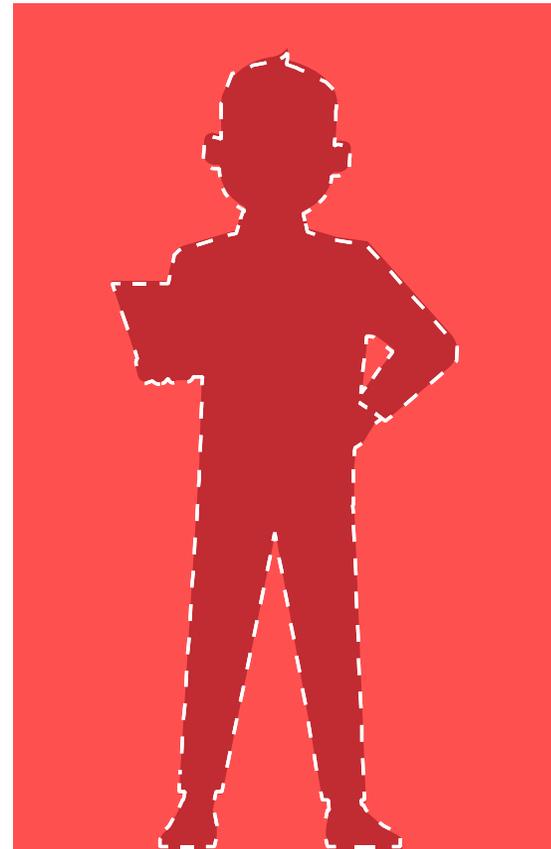

EXAMPLES OF INDIVIDUAL RIGHTS

Transparency

Be informed

Be forgotten

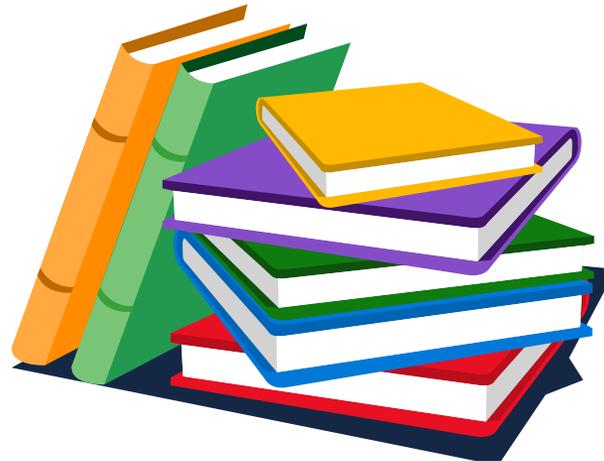

Data portability

Achieving compliance takes all three.

People

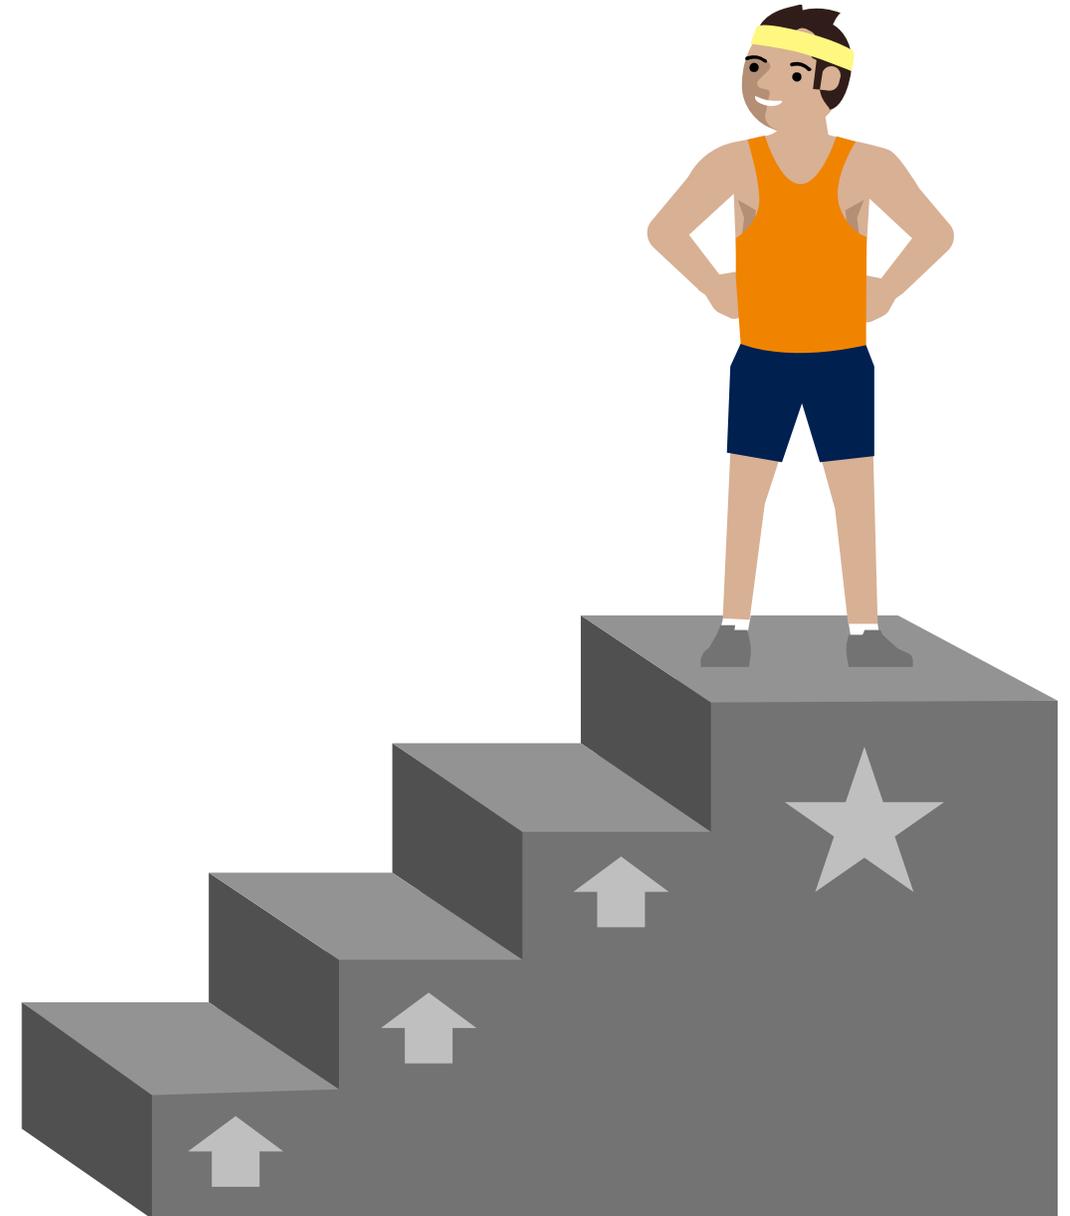

Process

Technology

STEPS TO PREPARE AS AN ORGANIZATION

1. Educate your leadership and employees
2. Define and communicate your data protection strategy
3. Understand how your organization uses personal data
4. Identify gaps
5. Address challenges around people, process and technology

Assess and manage compliance risk

An on-going assessment of your compliance posture with actionable insights to improve your data protection capabilities.

Protect personal data

Data governance and protection of your sensitive data across devices, apps both on-premises and in the cloud.

Streamline processes

Built in audit-ready tools that help you collaborate between teams and manage your processes.

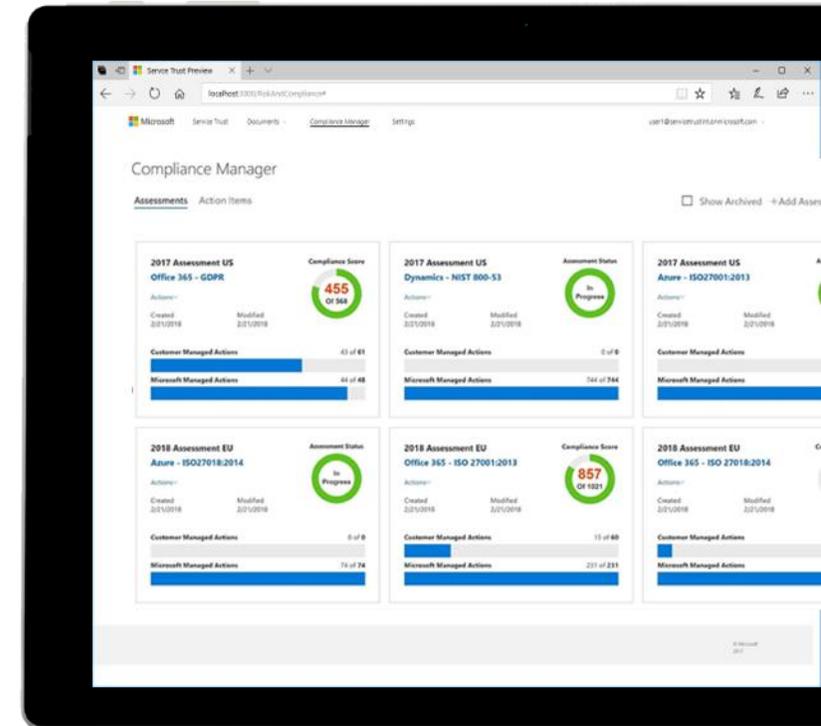

**MICROSOFT 365 IS
UNIQUELY
POSITIONED TO HELP
WITH COMPLIANCE**

Compliance Manager is a cross–cloud services solution, offered as part of Microsoft 365, designed to help organizations assess and manage compliance risk and meet complex compliance obligations.

Compliance Manager performs an on-going risk assessment that reflects your compliance posture against data protection regulations when using Microsoft cloud services, along with recommended actions, and step-by-step guidance.

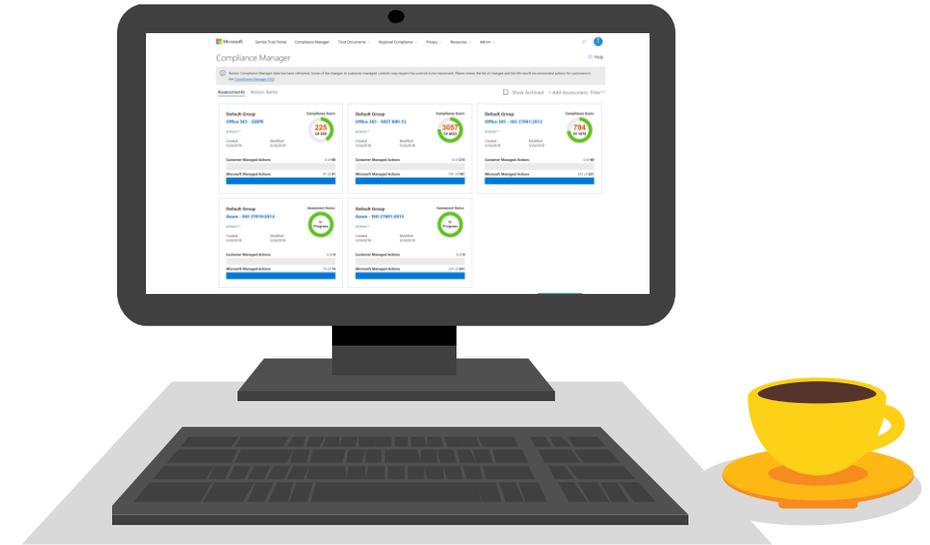

Compliance Manager services will help you:

- Identify which activities or requirements should be tracked
- Implement tracking and on-going assessment of compliance against regulatory requirements
- Provide actionable insights and step-by-step guidance to help improve your data protection capabilities
- Help you understand and use all the functionality included within Compliance Manager to simplify and streamline compliance

BOOK A **FREE** COMPLIANCE MANAGER INTRODUCTION

cubesys consultants will lead you through the Compliance Manager Portal and how best to get started

Challenges:

- Technology needs to support people and processes
- Tools that are currently in use may not enable GDPR compliance

Consider:

- Fit-for-purpose technology that supports competent people, effective processes and your overall compliance strategy
